

AARNA ROOTS LLC

Compliance & Certifications Overview

Draft Template — reference summary by destination market

Scope

This overview summarizes the compliance frameworks and product-safety regimes Aarna Roots coordinates against, organized by destination market. It is intended as a starting reference for buyer legal and compliance teams, not as a certification or legal opinion.

Social & Ethical Compliance

- BSCI (Business Social Compliance Initiative)
- SEDEX / SMETA (Supplier Ethical Data Exchange)
- WRAP (Worldwide Responsible Accredited Production)
- Buyer-specific compliance frameworks, applied on request

United States

- CPSC / CPSIA product safety requirements
- FTC textile and wool labelling requirements
- UFLPA-aware origin and traceability mapping, disclosed to the extent available per category

United Kingdom & European Union

- REACH chemical compliance
- GPSR (General Product Safety Regulation)
- EU deforestation and human-rights due-diligence regulation awareness

Testing & Quality

- AQL-based inline and end-line inspection
- Colourfastness, shrinkage and restricted-substance testing via accredited third-party laboratories

Important Note

Aarna Roots coordinates compliance execution across its factory network; it does not itself issue certifications. Exact certification status is confirmed per factory and per order during vendor mapping, and should be independently verified by buyer legal/compliance teams before order placement.
